Time to Register and Save

Registration is now open on the Columbia Council of Camera Club website for this year's Convention held at Clark College in Vancouver, Washington. On the website's main menu, "2019 Convention", will get you to information about this year's speakers and a schedule of events. If you are ready to register, you will find several links to get you going. Also on the front page you will find past Print and Electronic Image Divisions (EID) galleries of award winning pictures. Other menu items highlight the various functions of 4Cs. For example the "About" menu leads to a list of member clubs and a link to their websites.

Vender and Sponsors Support

We thank the vendors who will be at the convention with services and merchandise and those who donate prizes and financial support for speakers. Advance Camera from Portland will provide sensor cleaning and camera service. Focal Point from Dallas, Oregon has merchandise tables. HD Aluminum Printing from Vancouver, Washington will have a display with great discounts and donated door prizes. KEH plans to be there to buy and sell used equipment.

B and H Photo, Hunts Camera, and On1 will provide speaker support or donate door prizes. We plan to have a shared author's table where you can meet and buy books from presenters like Tim Boyer, David Vanderlip, and Ray Klein. "The Judge" judging software will be supporting Southern Oregon Photographic Association in presenting the EID Invitational competition. Thanks to all those vendors who are stepping up.

On the Columbia Council of Camera Club's website, you can find information about all the speakers. Six are featured here.

Seth Resnick: Keynote Speaker

Seth Resnick is a contemporary Master Photographer whose prolific career spans education, fine art, editorial, stock and commercial work. Seth is a photographer in love with the color, drama and wildness that only miles of travel can witness. His images bear testimony to a passion for capturing

moments that will never be repeated, to record beauty before it is forever lost, and to glorify the grand color palette that life offers up so freely to those willing to see it. "I feel that my photographs become a metaphor for life."

Marie Altenburg **Digital Art Through Textures**

"Textures can transform a simple snapshot into a work of art. We'll explore creating personal textures using your own images or by using Photoshop or Topaz Studio to make a texture on a blank digital canvas. Next we'll see how to apply these textures to your

photographs for a creative and artistic result. I get great satisfaction from creating these works of art and sharing them with others."

Presenters

Seth Resnick: Keynote

Tad Hetu: Luminosity Masks and Blending Images

Marie Altenburg: Making and Using Textures

Tim Boyer: The Art of Bird Photography and High Volume Image Processing

Jon Fishback: Fun with an LED Flashlight

David Vanderlip: Beginning to Intermediate Lightroom

Ray Klein: Discovering Value in Your Images

Scott Hoyle: Principles of Design for Photography

Wayne Hunter: Water Drop Photography

Sharp Todd: Competition Work Flow

Mary Ferness/Karen

McClymonds: Tips for Photographing the Black Pearl Friesian Horse Dance Troupe

(Presenters and Presentations are subject to change)

Tim Boyer

The Art of Bird Photography

“We’ll review the fundamentals of bird photography for creating beautiful images. Discussing the basics of Light, Sharpness, Point of View, Backgrounds, Edges of the Frame, Composition, and Exposure will provide a framework for better images. Intermediate and advanced

techniques will be presented for getting the best bird-in-flight images; ways to set up the camera for more successful results; and strategies for getting the sharpest images.”

Tad Hetu

Luminosity Masks

“Luminosity Masks, or Photoshop layer masks using graduated tonal ranges, have become useful tools in the development of images. My session will strip away the mystery and explain in simple terms what they are and how they are created

and used. In addition to tonal luminosity masks, other related tools and techniques will be discussed such as masks utilizing color ranges and the creation of custom masks combining multiple techniques. The session

will be a mix of prepared slides and using luminosity masks to develop an example image.”

Dove Release

Film Pack Camera Club's (FPCC) roots began in the summer of 1949 at Clark College when Delmar Harris and his photography class of eight students formed what is now the Film Pack Camera Club. This club met at Clark College until Harris retired in 1975. Today FPCC meets at Touchmark Fairway Village in east Vancouver.

Friday afternoon we will commemorate FPCC's 70th Anniversary by releasing seventy white doves to honor those who came before and recognize their efforts to keep the camera club part of the community. The event will be held on the main campus outside of Gaiser Hall where 4Cs conference is held. You are invited to take pictures as the doves are released. Immediately after, Seth Resnick will give his keynote address.

Jan Eklof
FPCC

Mary Furness

Tips for Photographing the Black Pearl Friesian Horse Dance Troupe

"I will be giving general information about the Troupe, the arena where the field trip is held, what is expected of you and your fellow photographers, how to behave safely around the horses, and how willing the owners and horses are to be photographed. I will use images taken by myself, Karen McClymonds, and Dotty

Weber to share shooting tips and illustrate the potential of photographing these beautiful animals with their riders. There will be time for questions and answers as well."

Karen
McClymonds

Jon Fishback

Fun with LED Flashlights

"My program is about having fun using LED flashlights; how to use these low-tech light sources to put light where you want it, to add shape and form, to highlight texture, to simplify an image to its essential forms, to create poems without words. I'll

give a brief program using images to illustrate what can be done, then give a demonstration of the process followed by questions and answers."
